

MARCELLE GOVENDER

Junior UX/UI Designer

074 840 8655 | marcigov15@gmail.com | Durban, South Africa | marcelle-govender.github.io

PROFESSIONAL SUMMARY

Junior UX/UI Designer and Web Developer with a Bachelor of Computer and Information Sciences (Application Development) from IIE Varsity College, graduating with a 94.9% aggregate. Combines user-centered design principles, wireframing, and prototyping in Figma with hands-on front-end development skills, giving me a practical understanding of how designs translate into working products. Currently working at Digital Junction, where I design and deliver responsive, user-focused websites for a range of clients, balancing visual design, usability, and technical feasibility. Experienced in explaining design rationale and technical concepts clearly through academic tutoring and mentorship roles. Looking to grow as a UX/UI Designer within a team that values thoughtful, user-first digital experiences.

DESIGN & TECHNICAL SKILLS

- UX/UI Design: Wireframing, Prototyping, User-Centered Design, Responsive Web Design, Mobile-First Design, Design Systems
- Tools: Figma, Canva, WordPress, Git, GitHub, Visual Studio, Android Studio
- Front-End Development: HTML5, CSS3, JavaScript (supports close collaboration with developers and feasible design handoff)
- Other Languages: C#, Kotlin
- Methodologies: Agile Methodologies, Software Development Lifecycle (SDLC), Quality Assurance, Business Process Automation
- Soft Skills: Communication, Client Relationship Management, Mentorship & Coaching, Teamwork & Collaboration, Attention to Detail

RELEVANT PROJECTS

TenderConnect — UX Case Study | Final-Year BCAD Project | AWS South Africa Collaboration

- Served as UI/UX Designer for the team, leading the user-facing design of an AI-assisted tender management platform and supporting front-end development within an Agile workflow.
- Designed the user experience for AI-driven tender categorization features, applying user-centered design thinking alongside SDLC best practices in collaboration with AWS South Africa.
- Have developed a detailed UX case study of this project, documenting the design process from problem definition through to interface decisions.

WordPress Website Portfolio | Digital Junction

- Designed and developed 10+ business websites featuring responsive web design, mobile-first layouts, SEO best practices, and customised WordPress themes and functionality.

Lucky Pig – Android Mobile Game | Mobile Application Development | Team Project

- Contributed to UI/UX components and gameplay logic for an Android application built using Kotlin and Android Studio.
- Used Git and GitHub for version control, managing code across branches within a cross-functional development team.

PROFESSIONAL EXPERIENCE

Web Developer / Web Designer | Digital Junction *Aug 2025 – Present*

- Designed and delivered 10+ responsive, mobile-first business websites and landing pages, applying UI/UX best practices, user-centered design principles, and cross-browser compatibility standards.

- Translated client requirements into visual designs and branding assets, including logos, flyers, and marketing materials, aligning visual identity with client strategies.
- Implemented business process automation workflows using Make.com, improving the usability and efficiency of client-facing digital solutions.
- Engaged directly with clients to gather requirements, present design and development solutions, and ensure stakeholder satisfaction throughout the project lifecycle.

Web Development & UI/UX Tutor | IIE Varsity College Durban North *Jul 2024 – Nov 2024*

- Tutored first-year students in web development, front-end development, and UX/UI design principles, enabling successful project completion.
- Guided students through practical projects applying user-centered design methodologies and responsive design techniques.
- Provided mentorship and resources to improve academic outcomes and build foundational digital design skills.

Cloud Development Tutor | IIE Varsity College Durban North *Mar 2025 – Nov 2025*

- Tutored second-year BCAD students in cloud development concepts, improving academic performance and understanding of cloud technologies.
- Facilitated debugging and problem-solving sessions, fostering critical thinking aligned with software development best practices.

Student Mentor | IIE Varsity College Durban North *2025*

- Guided peers academically and professionally, assisting with onboarding, academic support, and cross-functional collaboration.
